Professional Experience

HubSpot   *April 2022 - Present*
Senior Software Engineer

- Spearheaded improvements to development workflows used by 1,000+ engineers, including ESLint customizations, Git hooks, and plugins that streamlined code quality enforcement and reduced friction.
- Rolled out large-scale stack modifications across 1,500 repositories, implementing automated testing to ensure safe, efficient upgrades and tech debt remediation.
- Acted as a communication bridge for internal tooling changes, aligning developer understanding with evolving stack capabilities and direction.

Study.com   *November 2018 - April 2022*
Full Stack Engineer

- Developed end-to-end, A/B tested features for users to track completion for on-site courses for college credit such as progress bars, assignment notifications, and credit transcripts.
- Created interfaces and tests for crucial internal services to define upstream services to define how upstream services interact with our product and with each other, preventing miscommunications, downtime, and protecting with regression tests.
- Played a key role in migrating from AngularJS to ReactJS, introducing a componentized architecture and initiating a design system for consistent UI/UX across the site.

iD Tech   *June 2018 - August 2018*
Instructor

- Taught students aged 10–12 introductory web development (JavaScript and HTML), ensuring a solid understanding of programming fundamentals.
- Ensured every student had a firm grasp on fundamental concepts and left with a finished project.

Mosto Financial   *July 2016 - September 2016*
Software Engineer

- Full-Stack development for a website that acquired leads for the financial industry.
- Communicated with marketing department to increase traffic by over 200% month-over-month.

Education

Bachelor of Science: Computer Science   *June 2018*
University of California, Irvine
